

A Report on a comparison between TM and Yolo in experiment of building a model

	Teachable Machine Experiment	Yolo Experiment
Dataset	Animals' images	Animals' images
How did you use this tool?	Used this tool to build the model by dataset.	Used this tool to build the model by the same dataset of Used it before in teachable machine experiment.
Before Epoch		<p>150 epochs</p> 
After Epoch		<p>170 epochs</p> 
Result	99% accuracy before 100% accuracy after	After increasing the number of epochs, the accuracy increased

My opinion: After compared between two experiments in building the model by different tools. I found that the teachable machine tool gave me very effective results. Also, it was more accurate than Yolo tool. As the table above shows the comparison between them.
